THE BEECHER-TILTON SCANDAL THE STATEMENT OF MRS, TILTON Statement Made by Mr. Beecher Previous t the Publication of Mr. Tilton's

Charges. It is well known that Mr. Beecher ap and before the committee and made tement. It has not yet been given to the at its tone has been freely discussed se who are familiar with its contents. Beecher said, in substance, that It was day to come before the committee and the existence of an offence which he ammitted unwillingly against Theodore , and had endeavored to atone for it any ways during the last four years that some years ago he discovered in ongregation of Plymouth church women of many gifts rudely ded, and indicating the existence of an spiritual nature. She was completely d by the traditions of the Church, influence and necessity of a pure n lite, and at times seemed inspired tions that in a ruder age, when relias more a matter of sentiment, their tion would have given her prominence her or a seer. which she shrinks not. To reply in detail to the twenty-two arti

cles of arraignment she will not attempt at present, but if called upon to testify to each and all of them she shall not hesitate to do so. She solemply avows that long before the Woodbull publication she knows, by insinuation and direct statement, her husband to have repeated to her very near relatives and friends the substance of the accusation which shock the moral sense of the entire community this day.

"Many times," she says, "when hearing that certain persons had spoken ill of nim. he has sent me to chide them for so doing, and then and there I learned he had been before me with his calumnies against myself, so that I was speechless. The reiteration in his statements that he bad persistently striven to hide these so-called facts is utterly false, as his batred of Mrs. Beecher has existed these many years, and the determination to continued Mr. Tilton, "their report shall do circulated about me are grossly untrue, and ruin Mr. Beecher has been the one aim of me full justice it is all I ask, and I shall not I stamp them in general and in particular as ruin Mr. Beecher has been the one aim of

his life. "Again, the perfidy with which the bo liest love a wife ever offered has been recklessly discovered in this publication reaches well nigh to sacrilege, and, added to this, the endeavor, like the early scandal of Mrs. Woodhull, to make my own words condemn me, has no p-railel. Most conspicuously my letter quoting the reading of Griffith Gaunt, bad Mr. Tilton read the pure character of Catharine he would have seen that I litted myself beside it as near as any human being may affect an ideal; but it was ber character, and not the incidents of fiction succeeding it, to which I referred. Here was not a sin of criminal act or thought. A like confession with hers I had made to Mr. Tilton, in telling of my love to my friend and pastor one year before, and I now add that not withstanding all misrepresentations and anguish of some, I owe to my acquaintance and friendship with Mr. Beecher, as to no other instrumentality, that encouragement in my mental life and that growth towards the divine nature which enabled me to walk daily in a lively hope of the life beyoud the grave.

"The shamless charges in articles 7, 8, and 9 are fearfully false in each and every particular. The letter referred to in Mr. Tilton's tenth paragraph was obtained from me by importunity and misrepresentations that was necessary for him to use it in the impending difficulties with Mr. Bowen. I was then sick nigh unto death. I signed whatever he required without knowing or understanding its import. The paper I have never seen, and do not know what statements it

contained. "In charge eighteen a letter of mine addressed to Mr. Francis Moulton is quoted to It was a cruelty in Mr. Beecher-it was prove that I never desired a separation, or was advised by Mr. and Mrs. Beecher to leave my husband. I reply the letter was of Mr. Tilton's own concocting, which he induced me to copy and sign as my own; an in that statement. No committee in Christact which, in my sickness and mistaken thought to help him, I have too often done during these unhappy years. The implication that the harmony of the home was unbroken till Mr. Beecher entered it as a frequent guest and friend is a lamentable satire upon the household where to a thought of impurity; that the be bimself years before laid the corner-stone of free-love and desecrated it up to the time of my departure, so that the atmosphere was not only Godless, but impure for my children; and in this effort and throe of agony I would fain lift my daughters and all womanbood from the insiduous and diabolical teaching of these latter days. His frequent efforts to prove me insane, of weak mind, insignificant and mean presence, all rank in the category of heartlessness, selfishness and falsehood having its climax in his present endeavor to convince the world that I am or ever have been unable to distinguish between an innocent and a guilty love."

In summing up the whole matter Mrs. be innocent of the crime laid upon me; that of self-defence. But I can only express my never have been guilty of adultery with grief at the publication. The facts should Henry Ward Beecher in thought or deed, nor has be ever offered to me an indecorous or improper proposal. To the further charge but peace, but now the struggle is come I that I was led away from my home by Mr. Beecher's friends, and by the advice of a lawyer whom Mr. Beecher had sent to me, and who in advance of my appearing before the committee arranged with me the questions and answers which are to constitute my testimony in Mr. Beecher's behalf, I answer that this is again untrue, having never seen the lawyer until introduced to him a few moments before the arrival of the committee by my stepfather, Judge Morse."

She says she saw well nigh with blinding eves that Tilton had put into execution the almost daily threat of his life that he lived to crush out Mr. Beecher; that the God of battles was in him; that he had always been Mr. Beecher's superior, and all that lay in his path-wife, children, or reputation, it need be-should fall before this purpose.

Apparent-Mr. Tilton if he was surprised that the state ment had at last come to light?

Mr. Beecher himself, by his public demand upon me to do so-a demand which I had no right to refuse except at a sacrifice of all self-respect-I say Mr. Beecher alone, and not his committee, could have brough me to make this statement. Mr. Beecher and Mrs. Tilton together-for they are both acting in unison-have combined to force me to do what no other earthly power could have done, and that is, to divulge the facts which I gave to the committee; but I did not give them so much to the committee as to Mr. Beecher himself. He threw down the challenge, and Mrs. Tilton aided and abetted him in his defiance. Mr. Beecher struck a last blow at my good name, and Mrs. Tilton deserted my house and home in order to take part in this final attack. Nothing remained Tilton says: "I affirm myself before God to for me but to stand right on my manly right never have gone beyond the committee. Letters from At this point the Herald reporter looked Mrs. Tilton to Mr. Beecher of the most af at Mr. Tilton with great surprise, and in- fectionate character were brought before the committee by Mrs. Beecher, who has had charge of all her husband's correspondence for twenty years. It was found in investigating the matter that it has been Mr. Beecher's uniform practice to have all the mail which reaches the house opened and prepared for him by his wife, she answering or leaving handing a copy to Mr. Tilton, who opened him to answer, according to their importance. The letters which are directed umns, saw that his statement, or at least a to the pulpit or his study in the church are also opened by a subory he was astonished. The reporter asked dinate, and the envelopes are removed, the letters being left open on the desk, and those which reach the Christian Union office are opened there by a subordinate. As assistant editor of the Independent Mr. Tilton at one time opened all the mail matter which Mr. Beecher received through that address when acting as editor. Through all these sources letters are constantly reaching blm from women who are perhaps unaware of his peculiar habits in regard to his correspondence. It seems to the committee impossible that an intrigue should have been successfully carried on by one who had thus placed all the sources by which he could be addressed in the hands of others.

Mrs. Tilton-Catharine Gaunt, Etc.

[From the New York-World.] A large amount of evidence bearing upon the whole question has been submitted to the committee, and explanations of some parts of Mr. Tilton's statement, as well as of the documents interwoven in its story, have been already given by some of the persons concerned. The reference made to Catharine Gaunt in the letter of Mrs. Tilton, published in the statement, and dated Schoharie. June 29, 1871, as explained by herself, is considered to explain the whole circumstances on which the charges of Mr. Tilton rest. Catharine Gaunt, it will be remembered, was not a woman who had yielded to illicit intercourse, but one who had allowed the influence of a highly endowed priest to dominate her mind to the exclusion of her husband's influence, and this was what had happened in the case of Mrs. Tilton and Mr. Beecher. She declares in the most solemn manner that there had been at no time and at no period any impure or ignoble thought in the whole of the intimacy, much less any improper advance from Mr. Beecher. To each of the allegations of improper intimacy her evidence gives an emphatic denial. All which had subsisted between them was a deep intimacy grown of long acquaintance, dating to her childhood, and which had grown on her part to quote the information given "to a spiritual affection, which bordered closely on worship.' It was because this was in every man-WHEAT-White...... 238 ner pure and free from any taint of impure thought or feeling that she insisted so long

on her innocence in the whole matter It was for this reason that she claimed to be guiltless in all her intercourse with Mr. Beecher, and it was only when she read "Griffith Gaunt" that it occurred to her that to allow a relation of this character, pure as it was, to spring up and overshadow her regard for her busband was wrong. Like Catharine Gaunt, she had left her husband when she ought to have forgiven him, and it was the feelings induced by this fact which led to the latter's confessing wrong. In regard to other letters of a more explicit character and a later date, the evidence before the committee shows that they were written at a time when Mr. Tilton had compelled her return after a temporary separation by abducting her children. Letters of his were submitted proving the clandestine method in which this was done, and other evidence brought forward to show that this time she was so entirely under her busband's power, or influence, or both, that in his, presence she denied statements she quently she refterated, with the explanation of her husband. Evidence of her husband's charged her with frequent and almost continual infidelities, has also been submitted to

RICHMOND, July 23, 1874 Since our last weekly report we have had very general seasons in most of the tobacco-growing districts, which has greatly improved that part of the abled the planters in many instances to plant (in some cases) the whole of their usual crop, and in other instances one-half to twe-thirds. The market has ruled very firm during the week, with improved tendency, the advance in prices noted in our

last report being fully sustained, and from present indications are likely to remain so. We give below our revised quotations: BLACK.

THE TOBACCO MARKET AS REPORTED BY THE NEW YORK TOBACCO LEAF JULY 21.

Virginia full of varying interest, the speculative inquiry and demand extending, as it was easy to see it would do, to the substitutes, which were ignored while there was a full available assortment of more desirable stock to select from. In Virginia leaf there has stock to select from. In Virginia feat-intere has been no new feature since our last review, though business was fair throughout the week; but the general leaf market has had a spice of novelty to enliven it in the meantime in the brisk demand in-augurated for seed leaf suitable for cutting, and for Missouri factory lugs for export abroad and to Canada. During the earlier part of the week the deserting previously announced, of some of the parture, previously announced, of some of the making the market appear less animated than it had been, but the luli was of short duration, and the week closed with a considerable volume or sales effected not only of substitutes, but of Kentucky

"Speculators," a dealer informed us, "are buy "speculators," a dealer informed us, "are onying both factory lugs and all grades of seed leaf that
cutters have been using, and the indications are
that cutters will have to tave factory lugs for their
future use, as they will be relatively cheaper in in
seed leaf." Be this as it may, however, it is certain
that the movement of the hour has at last extended to and made itself felt in the domain of the sublives and resolver there there every it.

tatter use, as they will be relatively cheaper th n seed leaf." Be this as it may, however, it is certain that the movement of the hour has at last extended to and made itself felt in the domain of the substitutes, and reaching there thus early, it appears not unlikely that ere it abates a large portion of these graces will be bought up in the interest of those purchasers who inspired and control it.

Amid all that has been thought and said about specuation and high prices of late, it does not seem to have occurred to any one to observe that in the matter of price, we are still lower, on the average, than we were last year, or the year before, at this time. For instance, taking gold as the basis, quotations have ranged for low grades this year at 4.004, (a)640; last year they stood 5½00730; and in 1872, 7½00856; Medium grades of leaf on the last of ulty 1874, were 7½0086; last year they were 80010c, and in 1872, 90011c. We began selling trash tugs in March, 1873, for 8c, and over; they declined to 6c. This spring new true hius sold at 4c, and they have now advanced to 60054c, against 8c, a sear ago. On account of two large crops they went down to 4c, and ou account of the reported probable failure of the present crop they have grown to 4c, and ou account of the reported is shown only by comparison with the low range prevailing earlier in the season.

Respecting transactions in Virginia leaf the past week it may be observed, briefly, that it ere was some little activity, and that some sales of various grades were made, and among others, some small sales of both bright and dark wrappers. There was rather more than the usual inquiry for smokers, which are scarce. Receipts are light, and stock consequently continues light and shock consequently continues light and stock consequently continues light and short prevailing feeling that prices ought in some short prevailing feeling that prices ought in some way to respond to the solicitations of the manufacturers now of the self-industrial solicitations and the agregate In regard to this matter of prices it has always to be borne in mind that our exparters of operate ander limitations. They receive their orders to purchase at a given price, and it the orders caunot be filled at the price specified, their only alternatives is to await furiner instructions from their correspondents or a turn of the market. This fact necessarily makes them slow to reasond to a protected always and has to be takes into accountin all calculations based upon the hope of an advance. The sales reported comprises, as offere observed, assortments, but were largely Lande up of grades ranging from 35@40c.

Smoking.—For smooting tobacco there was an improved inquisy, rendered so, perhaps, by the possibility of increased tuture cost. Orders and call-sales were in excess of those of the preceding week.

Cigars.—These was a regular demand, as usual, for cigars, with no apparent change in the number ordered or sold. In this as in other branches of trade there's a gradually growing belief that the fall husing as will be bricker than that which has been had for a while past.
